

Notes for essay question on Chapter One posttest!

Archaeology: *The study of human history and prehistory through the excavation of sites and the analysis of artifacts.*

Anthropology: *The study of humankind, and human culture.*

Similarities between the two:

- *Both ask questions and test their conclusion against new evidence.*
- *Both study the past and present.*

Differences between the two:

- *Archaeology focuses on finding and studying artifacts.*
- *Anthropologist study artifacts, beliefs, and values of a culture to learn more about a culture.*
